

Heading Towards e-teaching

The workshop organized by Multi Eduvision, Jaipur was highly beneficial. The teachers who attended the workshop felt an ardent need to incorporate e-teaching techniques in their respective subjects esp. the Science and Maths faculty Members.

However no modules for languages have been designed by them.

The teachers participated in the workshop with great interest and interacted with the resource person as per their specific needs.

The S.St faculty would like to make use of the modules without the audio effects as they felt their interaction with the students would yield better results.

√ **No assignments were attached with the modules.**
