 - Behavioral
 - Economic
4. Product Perspective
5. Data flow diagram
6. Entity Relation Diagram
7. Data tables
8. Flow chart
9. Input forms
10. Conclusion

1. Analysis of Present system

Before we begin a new system it is important to study the present system that will be improved or replaced. We need to analyze how this system uses hardware, software etc. In this present age of competition our resume need to be prepared and updated according to the changing requirements of industry. The present system for resume building just provides wizard through which one can prepare resume only in given format.

Disadvantages of Present System

- Inability of modification of data
- Provides fixed format of resume
- Lack of immediate retrieval
- Inability of sharing the resume data
- Lack of expert guidance at every step of building resume

2. Characteristics of Proposed system

- Easy to edit and update resume
- Free Resume hosting
- Wide range of resume formats
- Expert guidance at every step of resume building
- Search for a particular candidate by skills

3. Feasibility Study

The feasibility study is carried out to test whether the proposed system is worth implemented. Feasibility study is the test of proposed system regarding its work ability.

The key consideration involved in the feasibility study is:

- Technical
- Behavioral
- Economic

Technical Feasibility:

Technical Feasibility center on the existing computer system and to what extent it can support the proposed system addition.

The technologies and the environment which are used in this project are:

Software:

- **Front-end**
 - **Web Technology:** PHP
 - **Languages Used:** PHP, JavaScript, HTML, CSS.
 - **Development Tool:** 5
 - **Web Server:** IIS
- **Back end**
 - **Database:** Sql Server
- **Operating System**
 - **Windows 9x**
 - **Any Operating System compatible with WWW**

Behavioral Feasibility:

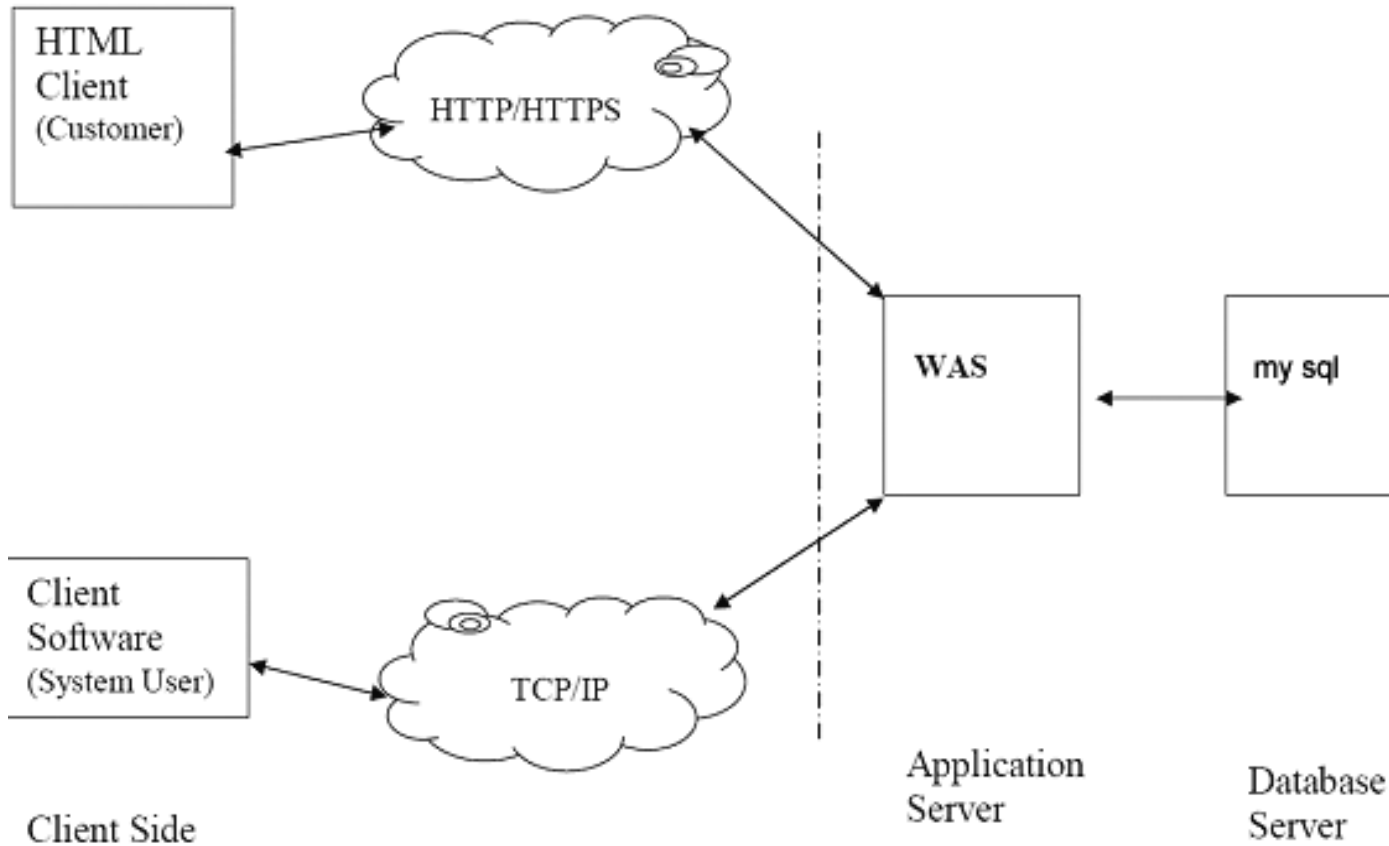

People are inherently resistant to change and computers have been known to facilitate change. An estimate should be made of how strong a reaction the user staff is likely to have towards the development of computerized system.

Economic Feasibility:

The procedure is to determine the benefits and savings that are expected from a candidate system and compare it with cost. If a benefit outweighs costs then the decision is made to design and implement the system otherwise further alterations are made in the proposed system.

- Manpower cost
- Hardware cost
- Software cost

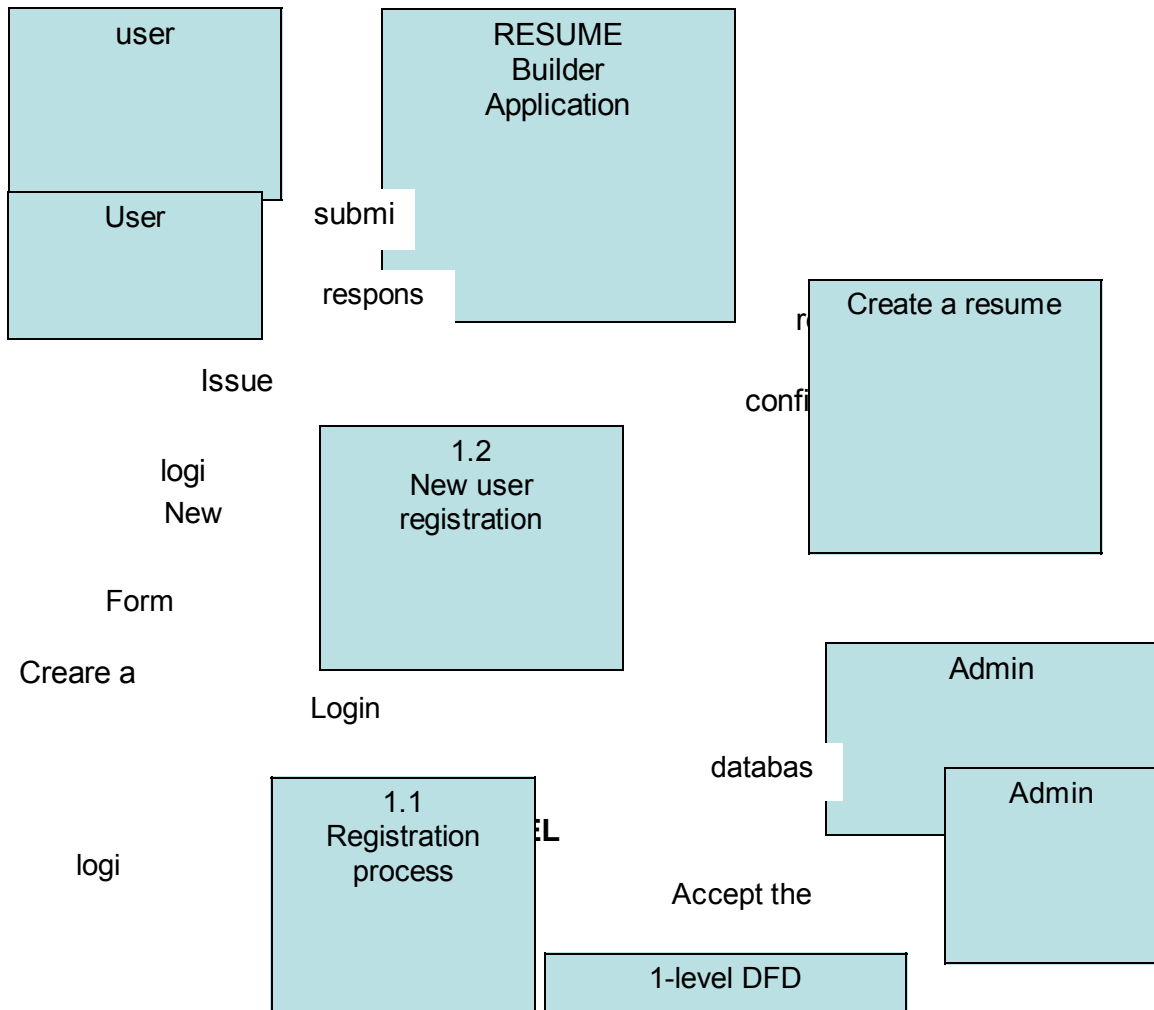

4.Product Perspective:

5. Data flow diagram

A data flow diagram is graphical representation that depicts the information flow and the transforms that r applied as date moves from input to output. It can be used to represent a software at any level of abstraction. In fact DFDs may be partitioned in to levels. That represents increasing information flow and functional details.

DFDs are defined in levels with every level decreasing the level of abstraction as well as defining a greater details of the functional organs of the system. A zero level DFD also known as context or fundamental system model represents the entire software elements as a single bubble with input and output data entities which are indicated as incoming and outgoing arrows.

6. Entity Relation Diagram

Entity Relation Diagram represents the object relationship pairs in graphical forms thus we can say that the primary goal of ER diagrams is represent data objects along with their relationships.

ER model for data uses three features to describe data:

- **Entities** which satisfy distinct real world items in an application
- **Relationships** connecting different entities and representing meaningful dependencies between them
- **Attributes** which specify various properties of entities and relations involved in a system.

7. Data tables

Login

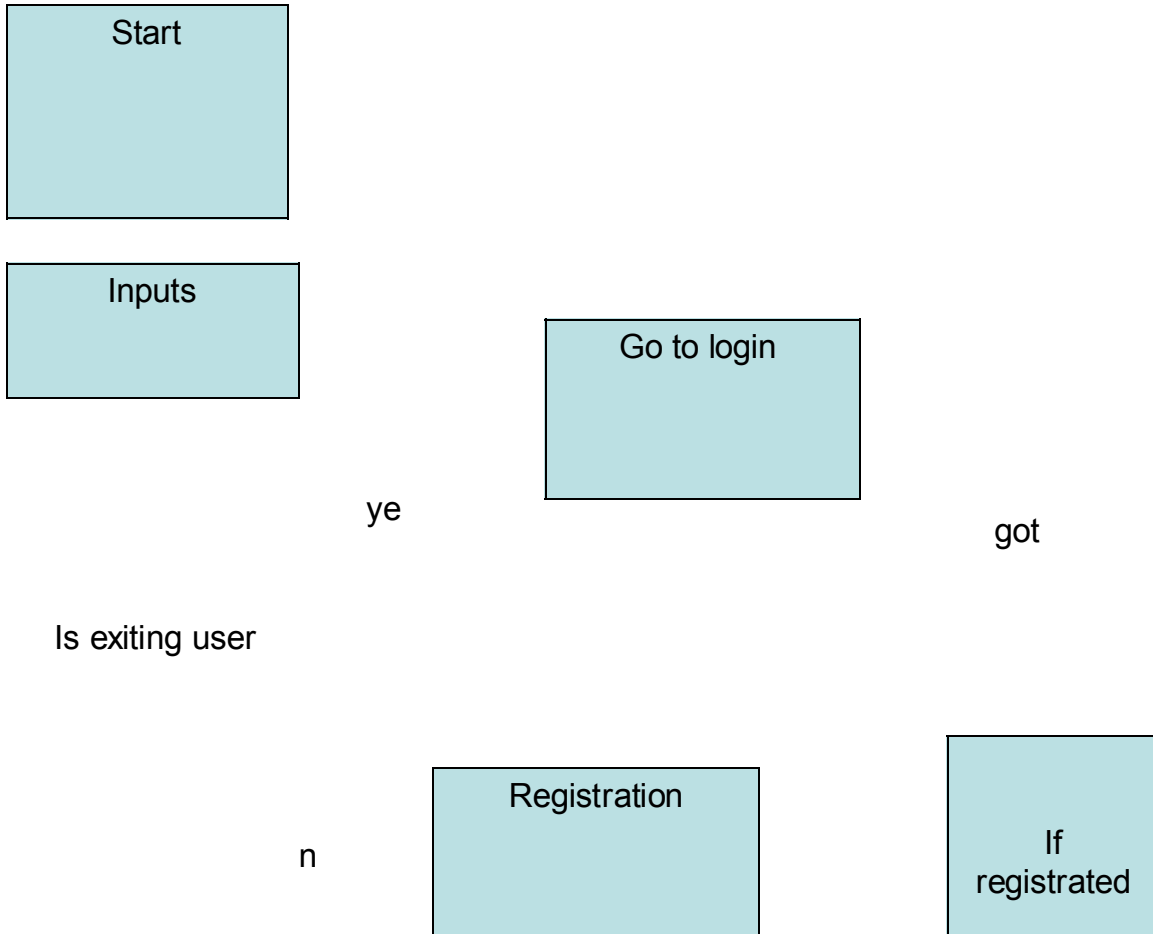

Field name	Data Type	Size
Id	Int	100
Email id	Text	-
Passward	Varchar	230
Fname	Varchar	230
Lname	Varchar	230
Phoneno	Int	20
City	Varchar	230
State	Varchar	230
Country	Varchar	230

Resumetails

Field name	Data type	Size
Id	Int	100
Useri_d	Int	100
Job_title	varchar	230
Company_name	Varchar	230
Company_address	varchar	230
Start_date	Varchar	230
End_date	Varchar	230
Job_description	varchar	230
Hobbies	Varchar	230
Achievements	Varchar	230
Secondary	varchar	230
Sr_secondary	Varchar	230
Graduation	Varchar	230
Pg	varchar	230
Name_of_pg_collage	varchar	230
Name_of_school	Varchar	230
Name_of_gard_collage	Varchar	230
Name_of_sr_sec_schoo l	Varchar	230
Year_grad	Varchar	230
Year_pg	Varchar	230

8. Flow chart

Flow chart is a graphical representation using symbol to show the step by step sequence of operation, activities or procedures used in computer system analysis , activity analysis and in program sequence representation.

9. Input forms

Here are some frequently asked question:

Q. How do I print a resume without the web address on it?
 A. It is your web browser, anytime you print off the internet the address will appear. Just email the resume to yourself, or download to Microsoft word and print from there.

Q. I have an account, but I can't login, it says I'm blocked, why?
 A. If you attempt to login more than three times unsuccessfully, it will block your account for your protection. Just email us, we'll unblock your account, and give you your login details.

Q. When I click on "view your resume" nothing happens, why?
 A. The resume comes in a pop up window. Just temporarily disable your pop up blocker in the "tools" bar across the top of your screen, or within your security settings on your computer.

Q. When I download my resume, it doesn't look right, why?
 A. It will only download to Microsoft word. If you don't have it, just email the resume to yourself in any/all the templates, and copy&paste into any document program.

Q. Why do I not receive the email of my resume?
 A. The website is sending the emails. Check your spam, or bulk folder.

10. Conclusion

This was our project of System Design Lab about “ONLINE RESUME BUILDER”. Development of this System takes a lot of efforts from us. We think this system gave a lot of satisfaction to all of us.

Though every task is never said to be perfect in this development field even more improvement may be possible in this system.

We learned so many things and gained a lot of knowledge about development field. We hope this will prove fruitful to us.
