

# Mathematics workshop

14 Feb 2016

India International School Sitapura organized a Mathematics workshop, on Sunday the 14<sup>th</sup> Feb when the world was celebrating Valentine's Day, 30 students from 12 different schools were strengthening their love for mathematics and enhancing their reasoning and logic skills.

The workshop was conducted by Bodhayan Sansthan, a registered society for enhancing Mathematical skills. The workshop comprised of two sessions and an exhibition. The first session was taken by Shri Sohan Lal Gupta on working with numbers and tricks for quick calculations. This was followed by session two, which was a practical session. Students worked in groups of six and prepared models on tangent properties of circle theorem.

They also made 3D solid shapes from paper and understood comparisons of fractions under the guidance of Shri Nagarjun Sharma. At the end, the students viewed an exhibition of various working models based on geometrical theorems.

Every student was awarded a certificate and a memento.
