

# New Initiatives at IIS

The proud fleet of buses at IIS have seen a major change in these past few months. Besides the GPS facility (provided to parents wherein parents can track the route of their ward), CCTV cameras and the voice recorder, the seats have now started getting new seat covers. High hygiene measures have been given priority.

This is not all, the students availing the bus facility were provided a healthy snack on 27th August. This was a pleasant gesture of the Chairperson that was deeply appreciated. This strengthened the bonding between the school with its students. This welcome gesture will be witnessed more often during the month.

The renovation of the wash-rooms has begun for the girls. The newly renovated washrooms will showcase a perfect blend of modern amenities and impeccable hygiene standards. They will feature sleek, contemporary designs with spacious layouts, offering a comfortable and inviting atmosphere. Equipped with advanced fixtures and eco-friendly materials, the washrooms will ensure both functionality and sustainability. Bright lighting, enhanced ventilation, and user-friendly fittings will contribute to a clean, safe, and refreshing experience for all students. The second and third floor will follow the ground and first floor. The fourth floor will be catered to towards the end. Hopefully, the work will culminate before the year ends. The mere thought of this change has given spring to the excitement in the air.
