

DICE GAME - CLASS CPP 1

The exciting Dice Game was a fun filled activity for children of CPP 1 designed to develop their social and self-management skills. The little ones were asked to make different stick position on each side of dice (box covered with paper). The students had to throw the dice as soon as the teacher stopped the music played by her. Thereafter, students had to make the same stick position that came on their dice. Students loved to make the positions and the smile on their faces charmed the parents too.
