

Educational Trip to B.M Planetarium

On 27th April 2019, India International School organized an educational trip to B.M Planetarium at Statue Circle for classes 6 and 7. The visit was arranged to give them an experience of The Earth and the Solar System. The trip was successful as the students learnt many things for which they were unaware. They learnt about different planets and their origin, distance between them and their composition. They got to know about the satellite NASA. Therefore, they organized a quiz to assess what they had learnt. The students enjoyed and learnt many things through this visit.
